Executive Summary of the Thesis

Title of the thesis

Master's Thesis in Xxxxxxxxxxxx Engineering - Ingegneria Xxxxxxxxxxx

Author: Name Surname
Advisor: Prof. Name Surname
Co-advisor: Name Surname
Academic Year: 20XX-20XX

---

1. Introduction

This document is an example of the PoliMi Executive Summary built with the modular `academicthesis` class.
The Executive Summary is required only if the thesis has been assigned to a reviewer (*controrelatore*) for an independent evaluation of its quality, scientific/technical relevance and original contribution.

2. Guidelines

The Executive Summary is a critical overview of your thesis with a focus on the main achievements that have emerged from your research. It should be organized in sections and paragraphs in order to better highlight the major points of your work. Its length should range from four to six pages, depending on the length of the thesis manuscript.

3. Equations, Figures, Tables

3.1. Equations

Maxwell's equations read:

$$\nabla \cdot \boldsymbol{D} = \rho, \tag{1}$$

$$\nabla \times \boldsymbol{E} + \frac{\partial \boldsymbol{B}}{\partial t} = \boldsymbol{0}, \tag{2}$$

$$\nabla \cdot \boldsymbol{B} = 0, \tag{3}$$

$$\nabla \times \boldsymbol{H} - \frac{\partial \boldsymbol{D}}{\partial t} = \boldsymbol{J}. \tag{4}$$

3.2. Figures

Figure 1: Caption of the Figure.

3.3. Tables

	column1	column2	column3
row1	1	2	3
row2	α	β	γ

Table 1: Caption of the Table.
